

Magellan® eXplorer® 110

Rugged Handheld GPS Device

North America

PRELOADED MAPS:

World Edition

Includes a detailed road network, land areas, transportation points, and water features of more than 200 countries.

Fundamentals for GPS Navigation

The Magellan eXplorer 110 GPS receiver comes with essential navigation features and is ready to use right out of the box.

A vibrant, transreflective color screen allows for the best readability in direct sunlight. To zero in on the exact location of a geocache, favorite fishing spot, or the next summit, the SiRFstarIII GPS chipset provides accuracy of 10-15 feet (3-5 meters). To keep your outdoor adventure going all day long, the device is powered by two AA batteries for 18 hours of constant usage. The eXplorer 110 is rugged, waterproof, and submersible (IPX-7). All of this is packed into a small and attractive handheld form factor that can be hung around your neck with the optional Magellan lanyard or attached to your pack with the built-in carabiner hook.

The eXplorer 110 is pre-loaded with the World Edition map, which includes a complete road network in the United States, Canada, Western Europe, and Australia and major roads throughout the rest of the world. This unique map also includes water features, urban and rural land use, and city centers.

With the 110 you can overlay a series of different transparent compass styles on top of the pre-loaded World Map that shows roads, water features, parks, and city centers. The dashboard screen a mini-compass for quick reference and customizable navigation data fields, such as latitude, longitude, heading, bearing, distance to end, trip odometer, and many more. View your active track, which is a series of digital breadcrumbs that records all your movements. Mark your starting point (car, trailhead, parking lot...) with a waypoint and easily navigate back at the end of the day.

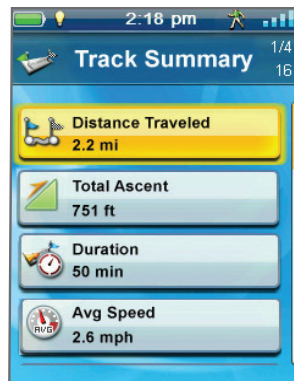

Reference your track summary to keep track of your distance travelled, elevation gained or lost, complete travel time, moving time and stopped time, and average time to find. Easily reset your track summary statistics to track the details of your next geocaching adventure.

No matter where you enjoy the outdoors, the eXplorer 110 GPS receiver will provide precise GPS signals thanks to the Satellite Based Augmentation Systems (SBAS) of WAAS, EGNOS, and MSAS; display coordinates in a myriad of different global systems, including UTM and WGS84; and accurately guide you to and from your next adventure, where ever in the world that may be.

Core outdoor navigation with a color screen, waterproof design, and preloaded World Edition map

A simple main menu, intuitive contextual menus, and vibrant graphics make this device easy to use.

The track summary screen allows you to quickly reference 16 statistics, including distance traveled and average speed.

Product specifications

Product Color	Gray and Blue
Battery Type	2xAA
Battery Life	18 hours
Screen Size	2.2"
Display Resolution, WxH	QVGA, 240 x 320
Display Type	Color, Transflective
Waterproof	IPX-7
Temperature Range	14° to 140° F - 10° to 60° C
High-Sensitivity GPS	SiRFstarIII
GPS Accuracy	3-5 meters
Antenna Type	Multi-directional Patch
WAAS/EGNOS/MSAS	Yes
CPU	233 MHz
Available Memory	500MB
Audible Alarms	Yes
USB Interface Method	Mini USB
Data Transfer Interface	USB 2.0 & Serial
Communication Protocol	USB Mass Storage
NMEA Output	Yes
Waypoints	500
Geocaches	500
Track Logs	10
Number of Track Points	5,000
Routes/Legs Per Route	25/25
Paperless Geocaching	Yes
Vertical Profile	Yes
Area Calculation	Yes
Accepts GPX Files	Yes
Preloaded Maps	World Edition
User Grid	Yes
Picture Viewer	Yes
Hunt/Fish Calendar	Yes
Sun & Moon Information	Yes
Languages	English, French, Spanish, German, Italian
